Professional Summary

Final-year **Computer Engineering** student specializing in **Artificial Intelligence & Machine Learning** with hands-on experience building production-ready **Computer Vision**, **Generative AI**, and **Full-Stack AI** applications. Proficient in **PyTorch**, **FastAPI**, **React**, **LangChain**, and **Retrieval-Augmented Generation (RAG)** for developing scalable AI systems. Passionate about solving real-world problems through modern AI technologies and software engineering.

Project Experience

CropScan • Explainable AI Crop Disease Detection Platform

[GitHub](#) — Apr 2026

- Developed an end-to-end **Computer Vision** pipeline using **EfficientNet-B4** with **Transfer Learning** to classify **16 crop disease classes**.
- Built an explainable diagnosis pipeline using **Grad-CAM**, improving model interpretability and prediction transparency.
- Designed a **RAG** advisory system using **LangChain**, **ChromaDB**, and the **LLaVA** multimodal LLM to generate grounded crop treatment recommendations.
- Deployed the solution using a **FastAPI** backend and **React** frontend for real-time inference.

Savour • AI-Powered Multimodal Recipe Discovery Platform

[GitHub](#) — [Live Demo](#) — Apr 2026

- Developed an AI-powered recipe discovery platform supporting **image**, **voice**, and text-based ingredient search.
- Implemented ingredient detection using **YOLOv8n** and **CLIP ViT-B/32**, with voice search powered by **OpenAI Whisper** and **spaCy**.
- Built a semantic recommendation engine using **all-MiniLM-L6-v2** embeddings and **ChromaDB**, enabling personalized recipe recommendations.
- Automated dietary classification using **facebook/bart-large-mnli** and engineered **15+ REST APIs** with **JWT**, **RBAC**, **MongoDB Atlas**, and **Vercel**.

E-Commerce Intelligence Suite — Predictive Analytics Platform

[GitHub](#) — Nov 2025

- Processed and analyzed **100K+** transaction records using **Pandas** and **NumPy**.
- Implemented **Apriori** association rule mining and **ARIMA** forecasting for cross-selling recommendations and inventory demand prediction.
- Developed an interactive analytics dashboard using **Streamlit** and **Plotly** to visualize sales trends and forecasting insights.

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, C, C++

AI/ML: PyTorch, YOLOv8n, EfficientNet-B4, CLIP, Whisper, LangChain, LangGraph, LLaVA, ChromaDB, Scikit-learn

Web: React.js, FastAPI, Node.js, Express.js, REST APIs

Databases: MongoDB Atlas, SQL, SQLite

Tools: Git, GitHub, Postman, Vercel, Cloudinary

Core CS: DSA, OOP, DBMS, Operating Systems, Computer Networks

Education

Vidyalankar Institute of Technology, Mumbai

Bachelor of Technology in Computer Engineering

Specialization: Artificial Intelligence & Machine Learning

2023 – 2027

CGPA: 8.935/10

Honours: Generative AI

Achievements

- Maintained a cumulative **CGPA of 8.935/10** while specializing in Artificial Intelligence & Machine Learning.
- Completed the **Larsen & Toubro Residential Machine Learning Program**, focusing on supervised learning, regression, classification, and data preprocessing.
- Built multiple end-to-end AI applications spanning **Computer Vision**, **Recommendation Systems**, **Multimodal AI**, and **Retrieval-Augmented Generation (RAG)**.

Certifications

- Tata - GenAI Powered Data Analytics Job Simulation** – Forage July 2026
- Machine Learning Training Program** – Larsen & Toubro (Residential Program) June 2025
- Software Testing with Generative AI** – Simplilearn Sep 2025
- Artificial Intelligence for Business** – Simplilearn Sep 2025
- Big Data** – Infosys Springboard Aug 2025
